Novatel Wireless

MiFi 2200 Mobile Hotspot

NOVATEL WIRELESS™ MiFi™ 2200 Mobile Hotspot

No more searching for a hotspot.

At work or at play, on the road or at the beach, the Novatel Wireless MiFi 2200 Mobile Hotspot gives your customers the speed and convenience of mobile broadband for up to 5 Wi-Fi devices – at the same time, even on the go. Whether you are multi-tasking or sharing the connection with other users, the MiFi provides a simple, easy to use personal mobile hotspot for internet access where and when you need it most.

Compared to a Mobile Broadband card, the MiFi 2200 offers the same speed and superior reliability of the mobile broadband network, but additionally offers

the same time and the convenience of using Wi-Fi for connectivity with those devices.

MiFi Features

The MiFi mobile hotspot allows customers to take the internet in their pocket virtually anywhere they go.

Multiple Devices: Supports up to 5 Wi-Fi-enabled devices simultaneously

Universal WiFi compatibility: Connects to most Wi-Fi compatible devices, including laptops, personal digital assistants, personal media players, cameras, media players or game consoles

Easy to use: Just turn it on and access the WiFi signal – no need to 'plug in' and no special software required. You can even use it from your pocket or briefcase

Mobile design: Sleek, lightweight design fits in the palm of your hand and provides up to 4 hours of continuous power on a single charge. Included 'socket saving' USB cable allows modem connectivity while charging from your laptop

GPS capable: Allows use of select position location and mapping applications

Advanced security: Includes password protection (WPA2-PSK or WEP) and firewall with SPI (Stateful Packet Inspection)

Settings management: Web user interface allows simple setup of MiFi and network connections, monitoring of data usage and management of security and user preferences

Benefits for Business

- > Access the Internet with a large array of devices from almost anywhere, even on the go
- > Use in a wide variety of business and personal applications
- > Share the connection with colleagues, co-workers and clients – no special software required
- > Enable Internet access at remote or temporary work sites
- > Provide convenient backup for wireline connections

Benefits for Consumers

- > Keep in touch and stay connected wherever you go
- > Access information, directions, etc. when on short trips around town, long trips, or vacation
- > Share the online connection with friends and family for Facebook updates, gaming, music, videos, etc. even when traveling

the advantage of connectivity for multiple devices at
